# MEHRBAN ALI

## AI Automation Engineer | RPA Developer | UiPath Certified

+92 341 2481025 | mehrbanali25062000@gmail.com | linkedin.com/in/mehrban-ali | mehrban-ali.vercel.app | Islamabad, Pakistan

**Nationality:** Pakistani | **Visa status:** Requires sponsorship | **Languages:** English (professional), Urdu (native) | **Availability:** Immediate | **Open to relocation:** UAE

## PROFESSIONAL SUMMARY

Robotic Process Automation (RPA) and Agentic AI developer with two years building unattended **UiPath** robots, AI voice agents and the **n8n / Make.com** pipelines behind them. Currently delivering client automation at Automaxion LLC — **25+ projects** across healthcare, education, e-commerce and data, including a voice-AI and RPA pipeline handling **100+ clinic bookings a day**. **UiPath certified** in Agentic Automation (2026, scored 100%). Seeking an **AI Automation Engineer / RPA Developer** position in the UAE with visa sponsorship.

## CORE COMPETENCIES

| | |
|---|---|
| **Robotic Process Automation (RPA)** | UiPath (Studio, Orchestrator, Robots, Action Center), REFramework, queues, triggers, unattended automation, VM deployment |
| **Agentic AI** | UiPath Agents, AI Agents, Voice AI, AI voice agents, LLM integration, prompt engineering, human-in-the-loop design |
| **Document & Data** | Document Understanding, OCR, data extraction, web scraping, Selenium, PDF automation, change data capture |
| **Integration** | REST APIs, webhooks, n8n, Make.com, Google Workspace, Microsoft Excel, Outlook, Gmail, Google Drive API |
| **Programming** | Python, C#, VB.NET, JavaScript, TypeScript, SQL |
| **Databases & Apps** | PostgreSQL, MySQL, Node.js, Express, React, Next.js, Git |
| **Engineering practice** | Process analysis, exception handling, retry logic, logging and monitoring, solution design |

## PROFESSIONAL EXPERIENCE

### Automation Developer (RPA & Agentic AI)

**Dec 2025 – Present**

**Automaxion LLC — Lahore, Pakistan**

- Delivered **25+ client automation projects** across healthcare, education, e-commerce and data.
- Built the voice-AI and RPA pipeline behind a clinic group's appointment book, running unattended at **100+ bookings a day** — the agent takes the call, the robot works inside the system of record.
- Built AI voice agents for UK and US universities speaking with **100+ prospective students a day**, qualifying each against the entry criteria for the programme they ask about.
- Built a competitor price and stock tracker covering **240+ Shopify stores daily**, with change detection holding a year of history in ~5.5M rows instead of ~180M.
- Delivered several projects end to end: a UiPath robot for collection, then the application around it — React / Next.js front end, Node.js and Express API, PostgreSQL — deployed to a VPS or Vercel.

### Junior RPA Developer

**Dec 2024 – Nov 2025**

**SYBROS TECH — Lahore, Pakistan**

- Built and shipped **20+ UiPath automations** across legal, healthcare, retail, automotive and finance workflows.
- Processed **597 scanned PDFs** through OCR and Document Understanding into structured output, replacing manual file-by-file entry.
- Built a two-phase legal case intake robot for a US county, matching jail-portal records against Clerk of Court case summaries.
- Automated invoice entry driven by Outlook triggers, with Document Understanding extracting fields from emailed invoices.
- Hardened the largest pipeline with **41 try/catch blocks and 7 retry scopes** plus failure screenshots, so batch runs recover instead of stopping on the first bad record.

- Integrated REST APIs (Google Distance Matrix, weather services) and used Invoke Code where the visual designer was the wrong tool for the transformation.

**RPA Intern** **Sep 2024 – Nov 2024**

**SYBROS TECH — Lahore, Pakistan**

- Built UiPath workflows automating Excel, PDF, email and Google Sheets tasks, including coded workflows where the visual designer did not fit.
- Published robots to Orchestrator and deployed them on virtual machines with scheduled and queue-driven triggers.
- Connected automations to external applications through UiPath Integration Service.
- Completed the RPA Challenge benchmark, where form fields move position on every submission and hardcoded selectors fail by design.

## SELECTED PROJECTS

**Clinic Booking & Scheduling Robots**

*UiPath · Orchestrator queues · UI Automation · Google Workspace · Microsoft 365*

Four robots running a clinic group's appointment book — booking, cancelling, rescheduling, recurring series, card-on-file checks — driven by Orchestrator queue items so each appointment is one retryable transaction. **26 try/catch blocks across 12 workflow files.**

**Multi-Channel AI Agent Suite — Voice, SMS and Email**

*Retell AI · ElevenLabs · Make.com · prompt engineering · knowledge bases · webhooks*

Four agents — inbound calls, outbound calls, SMS, email — answering on services, pricing, insurance and policy from a shared knowledge base, then handing a structured outcome to the booking robots. Inbound prompt on its **216th published revision**.

**Competitor Price & Stock Tracker — 240+ Shopify Stores, Daily**

*UiPath · n8n · PostgreSQL · Node.js · Google Drive API*

Three UiPath robots upload a product export per store daily; n8n writes only what changed into PostgreSQL, diffed inside the database so the scheduled and scripted paths cannot drift. **7,558 variants produced 136 history rows — 1.8%** of a full snapshot.

**AI Scoping Pipeline — Client Conversations into Delivery-Ready Tasks**

*React · TypeScript · Node.js · Express · MySQL · LLM orchestration*

Multi-tenant platform turning client conversations, transcripts and documents into scoped engineering tasks through four AI stages, each reviewed by a project manager before the next runs. Append-only versioning; idempotent tracker sync. **23,769 lines, 15 tables.**

**Legal Case Intake Automation — Two-Phase Record Matching**

*UiPath · UI Automation · Google OCR · Image Activities · Excel*

Phase one reads the county jail portal; phase two searches the Clerk of Court for every record it found. That search presents an image check, read with **Google OCR inside a retry scope**, so an unreadable image costs one retry rather than the run. Every Excel row keeps the source PDF it came from.

## CERTIFICATIONS

### PROFESSIONAL

UiPath Agentic Automation Developer Associate — UiPath — Jun 2026 – Jun 2028 · scored 100%

UiPath Automation Developer Associate — UiPath — May 2025 – May 2027

Make Certified Level 3, Intermediate — Make — Sep 2026 – Sep 2028

### FOUNDATION & COURSES

**UiPath** — Agentic Prompt Engineering · Introduction to Agentic Automation · UiPath Integration Service · Working with Orchestrator Resources as an Automation Developer · Introduction to Robotic Enterprise Framework · Explore Automation Development with UiPath — 2025–2026

**Make** — Make Certified Level 2, Basics · Make Certified Level 1, Foundation — 2026–2028

**Retell University** — Retell 101, Voice AI Agents (Module 1) — 2026

## EDUCATION

**BS Computer Science** — COMSATS University Islamabad — 2020 – 2024
